Why this pairing works for a cash buyer site

Epilogue at heavy weights has a condensed, high-energy personality — it communicates speed and confidence. Plus Jakarta Sans brings humanist warmth with rounded geometry, keeping body copy approachable. The contrast mirrors what a cash buyer site needs: urgency paired with trust.

GOOGLE FONTS IMPORT — REPLACE EXISTING LINK TAG

```
<link rel="preconnect" href="https://fonts.googleapis.com">
<link href="https://fonts.googleapis.com/css2?
  family=Epilogue:wght@400;500;600;700;800
  &family=Plus+Jakarta+Sans:wght@300;400;500;600;700;800
  &display=swap" rel="stylesheet">
```

Removes DM Serif Display, Inter, and Space Mono entirely. Both families are variable-weight — saves ~40KB and removes one render-blocking request.

```

3-STEP IMPLEMENTATION FOR ASHISH

Step 1 — Update :root tokens

Replace the entire :root block with the CSS above. The alias block means --navy, --green, --cream, --border, --amber all resolve to High Noon values automatically.

Step 2 — Swap the Google Fonts import

Replace the existing link tag with the Epilogue + Plus Jakarta Sans import from page 3. Remove DM Serif Display, Inter, and Space Mono.

Step 3 — Update font variable references

Find --font-serif in CSS, replace with --font-heading. Find --font-mono, replace with --font-sans with letter-spacing: 0.1em; text-transform: uppercase; font-weight: 700 for eyebrow labels.
